

MACK PHARMATECH Launches Two New Group of Companies

Kiran Badgujar
Managing Director
Mack Pharmatech
Pvt Ltd

Manoj Chaudhari
Director
Mack Pharmatech
Pvt Ltd

MACK PHARMATECH, a renowned lab equipment manufacturing company, was started in 1999 by two young technocrats – Kiran Badgujar, Managing Director, MACK PHARMATECH & Manoj Chaudhari, Director MACK PHARMATECH. Since the time of its inception the company has focused on offering internationally accredited and globally compliant equipment to the industry, which has helped the company gain an edge above its competitors. Initially, the company took some time to come up with the final product and all the efforts paid off with the very positive response it received from domestic as well as international pharmaceutical industry. MACK PHARMATECH is the 1st Indian company to have CE Certified lab equipment. It is also an ISO 9001:2000 certified company and manufactures equipment as per the ICH & GMP Guidelines. Today, MACK PHARMATECH has positioned itself as one of the preferred suppliers of Stability Chambers in India and across various overseas markets.

Both the partners attribute the growth of the company to a well-established marketing team, a strong network of dealers who represent the company across the country and a strong 'After Sales Services' team

which enables MACK PHARMATECH to respond quickly to the customers' queries and requirement and after sales support.

All the equipment is made in compliance with US-FDA as well as UK-MHRA norms. The Directors along with their marketing team and engineers frequently visit exhibitions in India and overseas to keep themselves abreast with the latest technologies. Company conducts in-house training sessions at regular intervals to educate employees about the latest trends and their implementation, which has helped the company to produce highly innovative products for the industry. The team reviews customer feedback on monthly basis to address them and plan the next line of action. **High quality of Products + Latest Technology + Prompt After Sales Service** differentiate the company from its competitors and grow at faster pace.

With the expertise, methodology and experience garnered by MACK PHARMATECH over the years the company has officially opened its doors to two new initiatives – MACK AURAA & MACK UNIVERSAL. These two new entities have been established to provide its proven effective business analysis and quality standards compliant services to its customers throughout the world to fulfill their requirements.

MACK AURAA aims at producing wide range of products which are globally compliant and of international standards. The products include: **Precision Balance, Analytical Balance, Standard Balance, Moisture Analyzer, UV/Visible Spectrometer, Ultrasonic Cleaners, Vials, Caps, Septas, Columns & Syringe Filters.**

MACK UNIVERSAL is engaged in supplying wide range of products, which are globally compliant and of international standards. The product range includes **Deep Freezer (upto -86 degree Celsius), High Pressure Pharma Washer, Decontamination Chamber, Refrigerated Centrifuge & Muffle Furnace.** Through eight regional locations, MACK UNIVERSAL is well equipped to & effectively support the project requirements at a fast pace to its existing & potential clients anywhere.

MACK PHARMATECH, MACK AURAA & MACK UNIVERSAL are dedicated to the highest level of scientific excellence, maintaining high international standards and adherence to global compliance for its entire range of products. The companies are committed to the highest standards of ethics and integrity.

With long term vision and strong ability, the team remains confident that it will continue to drive growth, achieve its strategic corporate objectives, and emerge stronger in its journey towards global leadership. The company also plans to have service stations in all key metro cities within India as well as abroad. ■
